CAREER OBJECTIVE

Motivated and enthusiastic B.Tech graduate seeking an opportunity to start my career in the IT industry where I can apply my knowledge of Java, MySQL, and Web Programming to develop innovative solutions, enhance my technical skills, and contribute to organizational growth.

EDUCATION

Bachelor of Technology (B.Tech)

M.S. Bidve Engineering College

Passing Year: 2025

CGPA: 7.24 / 10

TECHNICAL SKILLS

- **Core Languages & DB:** Java, MySQL
- **Frontend Technologies:** HTML, CSS, Javascript, React.js
- **Backend Frameworks:** Node.js, Express.js, Spring Boot.
- **Tools & Technologies:** Git, GitHub

PROJECTS

Homservices Booking Platform | HTML, CSS, MySQL, SpringBoot, React.js

- Developed a responsive web-based architecture to manage customer records and handle active service requests.
- Implemented secure, reliable customer data management profiles and granular service tracking features.
- Utilized a synchronized combination of frontend and backend environments for complete end-to-end workflow handling.

Bank Locker Administration Platform | HTML, CSS, MySQL, SpringBoot, React.js

- Most mid-sized banks and cooperative banks manage lockers through a paper-based, counter-driven process.
- A customer must visit the branch to apply, submit physical KYC documents, wait for manual verification, follow up in person for allocation status, and return again to make payments. There is no digital audit trail, no real-time locker visibility, and no structured workflow for bank staff.
- This system replaces that process with a structured, role-separated digital workflow where every stage - registration, KYC, request, approval, payment, allocation, access - is tracked, auditable, and visible to the right person at the right time.

PROFESSIONAL ATTRIBUTES

Key Strengths:

Quick Learner, Problem Solving, Team Collaboration, Adaptability, Good Communication Skills
